

I do not think that it is fair, legally or ethically to say that one person can share certain information and another cannot. It would be wrong to censure XM satellite radio from sharing any public information just because they can reach a larger audience. This sounds to me like sour grapes on the part of big radio and tv. They should not be attacking their competition, they should be thinking of newer and better ways of presenting themselves if they want a larger share of the pie. Please reject the NAB's petition 04-160 and help freedom ring.
